Multi-drug resistant epilepsies

MS cases in which the patient is disabled

Myasthenia gravis

Some type of motor neuron diseases like ALS which is intensified following by pregnancy and will seriously endanger mother life

Fetal conditions

Osteogenesis imperfecta

Osteochondrodysplasia

Osteopetrosis and infantile neuroaxonal dystrophy

Bilateral renal agenesis

Polycystic kidney

Multicystic dysplastic kidney

Potter syndrome

Congenital nephrotic syndrome and hydrops

Severe bilateral hydronephrosis

Alpha thalassemia and hydrops fetalis

Thrombotic disorders

Trisomy 13, 18, 3, 16, 8

Anencephaly

Cat cry syndrome

Holoprosencephaly

Syringomyelia

Cranioschisis

Meningoencephalocele

Meningoencephalocele

Thanatophoric dysplasia

Cyclopia with holoprosencephaly

Ichthyosis congenita

Schizencephaly
